CONTENTS

Foreword vii

Introductory Note 1

Chapter 1. Towards relativistic heavy ion collisions
"By small steps towards the stars"
D. K. SCOTT 5

Chapter 2. Multibaryon interactions at relativistic energies
A. M. BALDIN 95

Chapter 3. Shockwaves in nuclear matter — proof by circumstantial evidence
H. STOČKER, J. HOFMANN, J. R. MARUHN and W. GREINER 133

Chapter 4. Various aspects of the radial and tangential energy dissipation in heavy ion collisions at bombarding energies in the range 4–12 MeV.A.
M. LEFORT 197

Chapter 5. Central collisions of heavy ions at bombarding energies close to the coulombbarrier
P. KIENLE 241

Chapter 6. Quantum fluctuations within the fragmentation theory
J. A. MARUHN, J. HAHN, H.-J. LUSTIG, K.-H. ZIEGENHAIN and W. GREINER 257

Chapter 7. Transport description of heavy-ion reactions
H. A. WEIDENMÜLLER 273

Chapter 8. The time-dependent Hartree–Fock description of heavy-ion collisions
S. E. KOONIN 283

Chapter 9. Deep inelastic scattering of heavy-ions
D. M. BRINK 323

Chapter 10. On the spectroscopy of coherent states
R. A. BROGLIA, C. H. DASSO and H. ESBENSEN 345

Chapter 11. Three lectures on macroscopic aspects of nuclear dynamics
W. J. SWIATECKI 383

Chapter 12. Topics in heavy ion reactions
H. FESHBACH 451

Chapter 13. Heavy ion dynamics at intermediate energy
G. F. BERTSCH 483

Chapter 14. Quantum electrodynamics of strong fields in heavy ion collision
J. REINHARDT, B. MÜLLER and W. GREINER 503

Chapter 15. Dynamical aspects: coherent production of positrons in heavy ion collision
J. REINHARDT, G. SOFF, B. MÜLLER and W. GREINER 547

Chapter 16. Experiments related to quantum electrodynamics of strong fields
P. KIENLE 579
